Hiring Manager
ATEN Canada Technologies Inc.
Richmond, BC, V7A 5E3

Dear ATEN Canada Technologies Hiring Manager,

Please consider my application for the Software Engineer role as advertised on the UBC Careers Online Web site. I am graduating this May with a degree in Computer Science from the University of British Columbia. I am extremely interested in the intersection between green energy business and technology, and ATEN aligns with this interest of mine.

In my enclosed resume, I have worked in various technologies at Microsoft, SAP, and Credit Hero. This prior work experience makes me know how to work in a team, and be familiar with industry-level technology practices so that I can work independently without hindering the resources of your team.

My prior front-end experience in Credit Hero and a project called Campus Nutrition (campusnutrition.ca) gave me knowledge of Java, Javascript, HTML, CSS, and web technologies. These are all requirements listed in the job description, and I believe I will be able to contribute immediately to the company's needs.

In addition, my prior experience as a machine learning engineer at SAP, and cloud engineer at Microsoft have allowed me to learn about network technologies, and implement solutions to save on processing power. The job description mentions using IT resources efficiency and cost-effectively, and I believe my prior experience in this will allow me to help with this goal of ATEN.

I have worked hard to challenge myself to learn new skills. As noted from my prior experience, I make an effort to learn a new skill through each new job and find it rewarding to learn any skills that I have no prior experience in.

If my background and experiences meet this job, feel free to reach out to me through email at corbynkwan@gmail.com

Sincerely,

Corbyn
