GIS reflection questions

These questions are **anonymous** and they are **not** graded.

1. **How confident do you feel applying the GIS skills you've learned in this course to different datasets or problems?**

○	○	○	○	○
Not at all confident	Not very confident	Somewhat confident	Quite confident	Very confident

Additional comments:

2. **A flood has caused major bank erosion along a stretch of a river. Suggest one way we could quantify the erosion, and what data we would need.**

3. **In GIS, what is an attribute table and how is it useful?**

4. **If I have two Digital Elevation Models (DEMs) of the same place, surveyed 1 year apart, how can I use GIS to calculate the topographic change that has occurred in that year?**
