

THE UNIVERSITY OF BRITISH COLUMBIA

Faculty of Land and Food Systems

**Dekaban Scholar Seminar:
“Reproductive dysfunctions in
obesity and diabetes:
Neurobiological perspective”**

Joanna H. Śliwowska, PhD, D. Sc.

Associate Professor

Laboratory of Neurobiology

Department of Veterinary Medicine and Animal
Science

Poznan University of Life Sciences, Poznan, Poland

Wednesday, June 19, 2019

12:00-13:00

**Rudy North Lecture Theatre (Rm 101)
Djavad Mowafaghian Centre for Brain Health
2215 Westbrook Mall**

Host: Dr. Barbara Stefanska

Food Nutrition and Health Program, Faculty of Land and Food Systems

The seminar is supported by the Dr. and Mrs. Dekaban Foundation

Dr. Śliwowska leads the Laboratory of Neurobiology at the University of Life Sciences in Poznan where she conducts research on the impact of diabetes and obesity on reproductive function. Her research interest includes how environmental factors such as diet influence neuroendocrine systems, in particular the brain, and how obesity and diabetes cause disruptions of the reproductive system.
