Emerging from ten years of post–bubble recession, the Japanese business and economic system will need to enter a period of radical restructuring in order to return to the growth of former years and maintain its influential position in the development of new technologies. Japan’s choices for the future will have a major impact on its global trading partners. In this edited collection of papers, an international range of contributors discuss the fundamental issues faced by the Japanese business and economic system from historical, analytical and empirical perspectives. Their conclusions combine to present a view of the path Japan should take to restore its economy to optimal growth in the 21st century, and show how this path will affect global markets.

MASAO NAKAMURA received his B.S. and M. S. from Keio University in Tokyo, and his PhD from the Johns Hopkins University in Baltimore. His current Research interests include Japanese business and technology management practices and economic behaviour of firms and households. He has published extensively in leading economics and management journals including *Econometrica*, *American Economic Review*, the *Journal of Finance*.
and the Journal of Business. He is Professor of Commerce and Business Administration and of Applied Science at the University of British Columbia, where he also serves as Director of the Centre for Japanese Research and the Konwakai Japan Research Chair.
