

"This book is not only timely, but is a vital contribution to the furtherance of good practice."

A New Nursing Science Textbook for the 21st Century

This exciting new text presents a pragmatic approach to the philosophy of nursing science that underpins evidence-based practice (EBP), including an exploration of research methodologies. The author explains the foundational principles underpinning scientific enquiry. The text is written in a creative and accessible manner, and employs provocative arguments to challenge some of the approaches to nursing knowledge.
