EMBA Alumni	\$2,000

Includes accommodation and some meals
Limited spots available

About Health Care in England

England has a long history of public health care services with the establishment of the National Health Service (NHS) on July 5th, 1948. For the first time, hospitals, doctors, nurses, pharmacists, opticians and dentists are brought together under one umbrella organisation to provide services that are free for all at the point of delivery.

The NHS currently employs more than 1.4 million employees across the British Isles and serves all legal residents of the United Kingdom.

What you will learn:

- Gain insights from the European health care sector
- Gain insights into the British governmental and political system
- Gain insights into the National Health System (NHS)
- Compare health care delivery systems and apply a Canadian perspective on European health care issues.
