Search Basics

Or searching can be more complex

MBA Exchange: Library Resources and Services

Search Basics

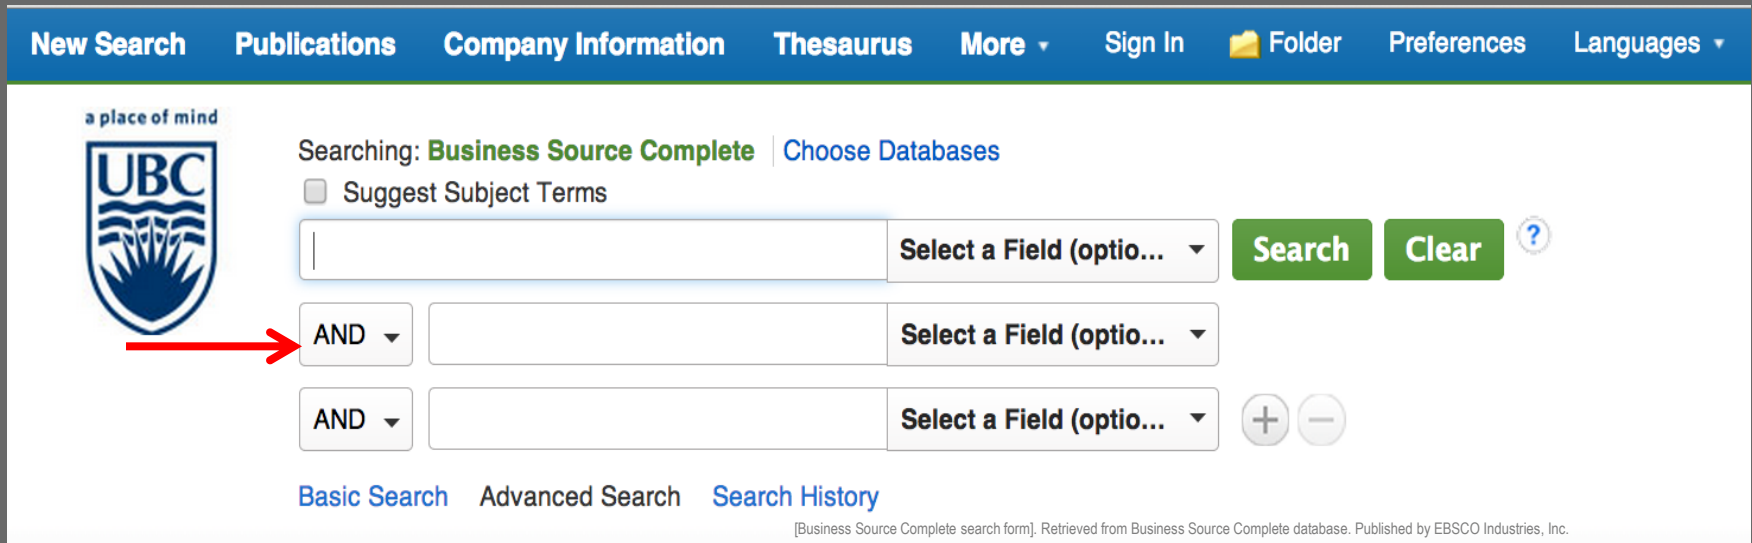

- Find relevant, high-quality market research data outside of UBC databases. Use the [Advanced Search Screen](#).
- Governments and NGO's are often good sources for data. Search them by [domain](#):
gov, org, gc.ca, gov.cn, gov.uk, etc.
- If your search yields too many results, change your search words, enclose phrases in quotation marks, limit by date, etc.

MBA Exchange: Library Resources and Services

Search Basics

- Business article databases search for exactly what you type:
What is the best way to market chocolate in Mexico?
- Use single words or short phrases, linked together using **AND** & **OR**

(Boolean operators)

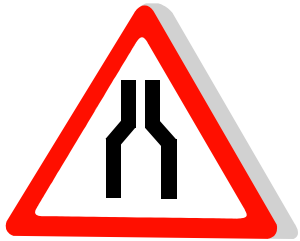

The screenshot displays the search interface for Business Source Complete. At the top, a blue navigation bar contains links for New Search, Publications, Company Information, Thesaurus, More, Sign In, Folder, Preferences, and Languages. Below this, the UBC logo is visible on the left. The main search area shows the current search term "Business Source Complete" and a link to "Choose Databases". A checkbox for "Suggest Subject Terms" is present. The search input field is empty. Below the input field, there are three rows of Boolean operators: "AND", "AND", and "AND". A red arrow points to the first "AND" dropdown menu. Each row also includes a "Select a Field (optio..." dropdown menu. To the right of the search input field are "Search" and "Clear" buttons, along with a help icon. At the bottom, there are links for "Basic Search", "Advanced Search", and "Search History". A small footer note reads: "[Business Source Complete search form]. Retrieved from Business Source Complete database. Published by EBSCO Industries, Inc."

MBA Exchange: Library Resources and Services

Search Basics

Combine search words using AND, OR to enable more precise searching in databases.

AND narrows
your search

Use between different
concepts in your search

“chocolate” and “Mexico”

OR expands
your search

Use between words with
similar meanings

“chocolate” or “confection”

SEARCH TIPS

- Each resource may use different words for your topic. Multiple searches will help you identify the right term(s).
- Use CTRL + F to quickly scan documents for your relevant words; also scan the *Table of Contents*
- Trying a variety of resources will yield better results: e.g. Google & a few databases
- Time management is key!
