COURSE INFORMATION

Course title:	Forecasting and Time Series Prediction		
Course code:	BABS 502	Credits:	1.5
Session, term, period:	2019W2 Period 4	Class location:	HA 337
Section(s):	BA1	Class times:	Mon. and Wed. 4-6pm
Course duration:	Mar. 2 to Apr. 9, 2020	Pre-requisites:	BABS 507, BABS 508
Division:	Operations and Logistics	Co-requisites:	N/A
Program:	MBAN		

INSTRUCTOR INFORMATION

Instructor:	Martha Essak, M.Sc.		
Phone:	778-819-8368	Office location:	HA 351
Email:	martha.essak@sauder.ubc.ca	Office hours:	Mon. and Wed. 1-2pm

COURSE DESCRIPTION

Forecasting is an integral part of decision-making activities. Organizations define goals, seek to predict environmental factors, and then take actions that they hope will result in the achievement of these goals. Forecasting allows organizations to decrease their dependence on chance and become more scientific in dealing with their environments. Today, forecasting rests on solid theoretical foundations while also having a realistic, practical base that increases its relevance and usefulness to organizations. This course covers the full range of major forecasting methods, providing a complete description of their essential characteristics and presenting the steps needed for their practical application, while avoiding getting bogged down in the theoretical details that are not essential to understanding how the various methods work. It provides a systematic comparison of the advantages and disadvantages of various methods so that the most appropriate method can be selected for each forecasting situation.

COURSE FORMAT

Class time will consist of lectures, discussions and activities. Students will complete quizzes, readings, homework assignments, and the project outside of class time.

LEARNING OBJECTIVES

This course will:
1. Introduce students to basic forecasting concepts and to major forecasting methods.
2. Teach students a structured and objective approach to forecasting.
3. Enable students to use forecasting to address different business problems.

At the end of the course, students will be able to:
1. Appreciate the key role that forecasting plays in organizational decision-making.
2. Understand and effectively apply the full range of major forecasting methods used in practice, and appreciate their strengths and weaknesses in view of their practical application.
3. Use forecasting to derive managerial insights relevant to the intended application.
4. Use and interpret output from statistical software, and critique and interpret forecasts prepared by others.

ASSESSMENTS
Summary

Component	Weight
Assignments	40%
Project	40%
Quizzes	10%
Professionalism and participation	5%
Judgmental forecasting class project	5%
Total	100%

Details of Assessments
Homework Assignments
Students will **individually** to solve the problems in the homework assignments. Late submissions will not be accepted and will receive a zero. Homework assignments should be handed in electronically via the UBC Canvas system. Assignments will be graded on correctness and clarity.

Project
Students will work **individually** on a project (in report form) that uses the techniques learned throughout the course. **You may not work with classmates or obtain outside help**. Please consult with the instructor if you need help or clarification.

Quizzes
Students will work **individually** on the quizzes, which are designed to be completed after you have finished the readings about that material.

Professionalism and participation
Professionalism and participation will be assessed based on: punctuality, preparation for class, participation in class activities, contribution to class discussions, and interaction with peers and the instructor.

Judgmental forecasting class project
This is a project that will be completed by the entire class. Each group will be graded on their contribution to the class project.

LEARNING MATERIALS
Required Reading Materials: "Forecasting: Principles and Practice, 2nd edition" by Hyndman and Athanasopoulos (2018). This text is available for free online at https://otexts.com/fpp2/
Readings are indicated in the course schedule.

Technology Requirements: Laptop installed with R, RStudio and Microsoft Excel. Please bring your laptop to each class as we will work through examples.
R: http://www.r-project.org
RStudio: http://rstudio.org/download/

COURSE-SPECIFIC POLICIES AND RESOURCES

Missed or late assignments, and regrading of assessments
Late submissions will not be accepted and will receive a grade of zero.

Academic Concessions
If extenuating circumstances arise, please contact the RHL Graduate School program office as early as reasonably possible, and submit an Academic Concession Request & Declaration Form https://webforms.sauder.ubc.ca/academic-concession-rhlee. If an academic concession is granted during the course, the student will be provided options by RHL, or by the instructor in consultation with RHL, per UBC's policy on Academic Concession.

Code Plagiarism
Code plagiarism falls under the UBC policy for Academic Misconduct. Students must correctly cite any code that has been authored by someone else or by the student themselves for other assignments. Cases of "reuse" may include, but are not limited to:

- the reproduction (copying and pasting) of code with none or minimal reformatting (e.g., changing the name of the variables)
- the translation of an algorithm or a script from a language to another
- the generation of code by automatic code-generations software

An "adequate acknowledgement" requires a detailed identification of the (parts of the) code reused and a full citation of the original source code that has been reused.
Students are responsible for ensuring that any work submitted does not constitute plagiarism. Students who are in any doubt as to what constitutes plagiarism should consult their instructor before handing in any assignments.

POLICIES APPLICABLE TO COURSES IN THE ROBERT H. LEE GRADUATE SCHOOL

Attendance
Excepting extenuating circumstances, students are expected to attend 100% of their scheduled class hours. Absent students limit their own academic potential, and that of their classmates, and cause unnecessary disruption to the learning environment. Students missing more than 20% of the total scheduled class hours for a course (including classes held during the add/drop period) without having received an academic concession will be withdrawn from that course. Withdrawals, depending on timing, could result in a "W" or an "F" standing on the transcript.

Punctuality
Students are expected to arrive for classes and activities on time and fully prepared to engage. Late arrivals may be refused entry at the discretion of the instructor or activity lead. Students arriving later than halfway through a scheduled class will be treated as absent for that class.

Electronic Devices
Devices such as laptops, tablets, and cell phones are not permitted to be used in class unless directed by the instructor for in-class activities. Students who do not follow the School's policy in this regard may be required to leave the room for the remainder of the class, so that they do not distract others. Research shows that students' use of laptops in class has negative implications for the learning environment, including reducing their own grades and the grades of those sitting around them.

Citation Style
Please use the American Psychological Association (APA) reference style to cite your sources.

Details of the above policies and other RHL Policies are available at:
http://www.calendar.ubc.ca/vancouver/index.cfm?tree=12,199,506,1625

UNIVERSITY POLICIES AND RESOURCES

UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available on the UBC Senate website at https://senate.ubc.ca/policies-resources-support-student-success.

Academic Integrity
The academic enterprise is founded on honesty, civility, and integrity. As members of this enterprise, all students are expected to know, understand, and follow the codes of conduct regarding academic integrity. At the most basic level, this means submitting only original work done by you and acknowledging all sources of information or ideas and attributing them to others as required. This also means you should not cheat, copy, or mislead others about what is your work. Violations of academic integrity (i.e., misconduct) lead to the breakdown of the academic enterprise, and therefore serious consequences arise and harsh sanctions are imposed. For example, incidences of plagiarism or cheating may result in a mark of zero on the assignment or exam and more serious consequences may apply if the matter is referred to the President's Advisory Committee on Student Discipline. Careful records are kept in order to monitor and prevent recurrences.

COPYRIGHT

ACKNOWLEDGEMENT

UBC's Point Grey Campus is located on the traditional, ancestral, and unceded territory of the xwməθkwəy̓əm (Musqueam) people, who for millennia have passed on their culture, history, and traditions from one generation to the next on this site.

COURSE SCHEDULE

(Subject to change)

Class	Date	Topic	Readings or Activities	Assessments due
1	Mar. 2	Course Overview, Introduction to Forecasting	Ch. 1 – 4	
2	Mar. 4	Introduction to Forecasting		**Assignment #1**: Basic Forecasting methods Due Date: Friday, Mar. 13, 11pm
3	Mar. 9	Basic Forecasting Methods		
4	Mar. 11	Time Series Decomposition	Ch. 6	**Assignment #2**: Time Series Decomposition Due Date: Friday, Mar. 20, 11pm
5	Mar. 16	Time Series Decomposition		
6	Mar. 18	Exponential Smoothing Methods	Ch. 7	**Assignment #3**: Exponential Smoothing Methods Due Date: Friday, Mar 25, 11pm
7	Mar. 23	Exponential Smoothing Methods		
8	Mar. 25	ARIMA Models	Ch. 8	**Assignment #4**: ARIMA models Due Date: Friday, Apr. 3, 11pm
9	Mar. 30	ARIMA Models		
10	Apr. 1	Simple and Multiple Regression	Ch. 5	
	Apr. 6-9	Final exam week		**Final project deadline TBA**
