

COURSE INFORMATION

Course title:	Customer Analytics	Credits:	1.5
Course code:	BAMA 520	Class location:	Class Zoom Link
Session, term, period:	Period 2	Class times:	M/W 6-8pm PST
Section(s):	001	Pre-requisites:	n.a
Course duration:	Jan 4 to Feb 3, 2021	Co-requisites:	n.a
Division:	Marketing & Behavioural Science		
Program:	MBAN		

INSTRUCTOR INFORMATION

Instructor:	Yanwen Wang	Office location:	Office Hour Zoom Link
Phone:	604-827-0078	Office hours:	Friday 7-8pm PST
Email:	yanwen.wang@sauder.ubc.ca		

Teaching assistant:	Zining Wang
Office hours:	Wed 4-5pm PST
Email:	zining.wang@sauder.ubc.ca

COURSE DESCRIPTION

Traditionally, marketers have focused on the acquisition of new customers through mass advertising and price-oriented promotions, accepting as a fact of life that newly acquired customers would eventually switch to competitors. Today, the focus has changed from customer acquisition to customer development and retention, particularly for the firm's best customers. This shift from customer acquisition to development and retention requires a new mindset from product-centric to customer-centric management and raises new questions. For instance, what is the maximum amount a firm should spend to acquire a customer? Should firms want to keep their customers forever? What can be learned from customer defection?

New forms of information technology provide increasingly rich data of individual-level customer behavior to address these issues but few firms have the expertise to intelligently act on such information. This course will provide students with the analytical tools that are necessary for understanding and predicting customer behavior and assessing customer lifetime value. The course will be grounded in relevant academic work as well as cases and exercises covering a broad set of industries and applications.

You will develop a deep understanding of customer centricity and its implications for the firm, learn about state-of-the-art methods for calculating customer lifetime value and customer equity, and develop the analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issues around customer acquisition, development, and retention.

COURSE FORMAT

Class time will be used for a combination of lectures, discussion, solving sample problems, and case discussions. Attendance is expected to accomplish the learning objectives below. Lectures and discussions will assume that students having pre-read the corresponding chapters and case studies as listed in the course schedule below.

LEARNING OBJECTIVES

By the end of this course, students will be able to:

1. Understand the importance of customer-centric valuation
2. Link customer satisfaction, loyalty program, and recommendation system with the broad concept of customer relationship management
3. Apply key customer value analytics tools to a real customer database
4. Recommend strategies based on customer relationship analytics

ASSESSMENTS

Summary

<u>Component</u>	<u>Weight</u>
Assignments	16 %
Group projects	39 %
Final exam	35 %
Class participation	<u>10 %</u>
Total	<u>100%</u>

Details of Assessments

Individual Assignments (8% *2)

There are two individual assignments during the term. The objective is to help you gain better understanding of the skills taught in class.

Group Assignments (13%*3)

Each group has 4 team members. You will stay in the same team for all the four group assignments. If you want to choose team member and form your own team, please form your teams on Canvas under the "People - > Group Assignment" sector by midnight Jan 5th 2021 PST. If you do not form a team by then, I will randomly assign you to a group and reveal group formation information in class on Jan 6th 2021.

Please answer all the suggested questions for each group case write up. The objective is to help you learn data analysis skills through practice and from each other. Group assignments must be prepared individually for each group. Sharing work across groups is strictly prohibited in line with the RHL Academic Misconduct Regulations. Peer evaluations will be conducted at the end of semester.

Peer evaluations will be completed at the end of the term to provide feedbacks on how team members think each member (including their own) is contributing to the final group project. Individual grades on group assignment may be subject to adjustment following my review of peer evaluations. Reductions can be significant, ranging from a decrease of 10% to a decrease of 100% if an individual has contributed little or nothing to the team's work. In most instances, where team members are reliable and contribute, no adjustments are made.

Students are required to complete peer evaluations by the specified deadline (announced before the end of the class). Failure to complete the evaluation will result in a 10% reduction in the mark received for the group assignment portion of this course (for example if you got 35 out of 35 on the group assignment score and did not complete peer evaluations your total group score will be adjusted to 31.5). Please ensure that you complete the peer evaluations on time.

Class Participation (10%)

We will devote a significant portion of class time to solving practice problems and cases. In order to maximize the benefits to you, it is of utmost importance that you be prepared to discuss the materials during class. For effective class participation includes:

- (1) **complete all the class-activity surveys on time. All the class surveys are designed to help facilitate in-class discussions.**
- (2) engage in all the i-clicker questions in class
- (3) install all the software prior to the in-class lab sessions,
- (4) ask questions about concepts related to class or lecture contents,
- (5) share your experience or point of view with the class,

Note that attending class and not speaking has neither a positive nor a negative impact on your participation score.

We will use **iClicker** for attendance, in-class activity, or quizzes. iClicker sync is already setup in Canvas. You can find it in the left side bar when logging into this course on Canvas. Please follow the student guide [\[click here\]](#) to link your **iClicker Reef account** with Canvas.

Final Exam (35%)

This course uses Proctorio for the final exam. This tool was chosen in order to address accreditation requirements and maintain academic integrity for tracking academic progress of individual students. For more information, please refer to the [UBC Proctorio Student Guide](#). If you require accommodations for accessibility needs or technical/connectivity issues, please contact the Centre for Accessibility or your Enrolment Services Advisor.

LEARNING MATERIALS

Course pack

There is no required textbook for this course. Instead, we will use **a combination of cases and articles** for readings. All the class materials can be accessed from Canvas or through purchase (\$13.80 see Course Pack info below).

Course Pack

1. Go to the Ivey Publishing website at www.iveycases.com
2. [Log in](#) to your existing account or click "[Register](#)" to create a new account and follow the prompts to complete the registration. If registering, choose the "Student User" role.
3. Click on this link or copy into your browser: <https://www.iveycases.com/CoursepackView.aspx?id=27844>
4. Click "Add to Cart".
5. You may choose to order in either **print** or **digital** format.
 - To order the material in digital format, check "digital download" and click "OK".
 - To order a printed copy for delivery, enter the print quantity required and click "OK".Please note that shipping charges will apply.
6. Go to the Shopping Cart (located at the top of the page), click "Checkout", and complete the checkout process.
7. When payment has been processed successfully, an Order Confirmation will be emailed to you immediately and you will see the Order Confirmation screen.

- If you ordered digital copies: Click "Download your Digital Items" or go to "My Orders" to access the file.
- If you ordered printed copies: Your order will be printed and shipped within 2 to 3 business days.

IMPORTANT: Access to downloadable files will expire 30 days from the order date, so be sure to save a copy on your computer. The downloadable file is a PDF document that can be opened using Adobe Reader.

This material is for your personal use only and is not to be shared or distributed in any form.

You will also be required to use several market research tools including Tableau, R and Rstudio in this course. Please follow the instructions below to install the software.

Data analysis software

Tableau

1. [Download the latest version of Tableau Desktop and Tableau Prep Builder here](#)
2. Click on the link above and select "Download Tableau Desktop" and "Download Tableau Prep Builder". On the form, enter your school email address for Business E-mail and enter the name of your school for Organization.
3. Activate with your product key: TCBM-68D2-F2A0-CF96-8B6D
4. Already have a copy of Tableau Desktop installed? Update your license in the application: Help menu → Manage Product Keys
5. If you are new to Tableau, please review [Data Analytics for University Students guide](#) to get started.
6. Students can continue using Tableau after the class is over by individually requesting their own one-year license through the [Tableau for Students program here](#).

R and Rstudio

- Install r-base: <https://mirror.its.sfu.ca/mirror/CRAN/>
- Install RStudio desktop Free version: <https://www.rstudio.com/products/rstudio/download/>

COURSE-SPECIFIC POLICIES AND RESOURCES

Missed or late assignments, and regrading of assessments

Late submissions will not be accepted and will receive a grade of zero.

Academic Concessions

If extenuating circumstances arise, please contact the RHL Graduate School program office as early as reasonably possible, and submit an [Academic Concession Request & Declaration Form](#) <https://webforms.sauder.ubc.ca/academic-concession-rhlee>. If an academic concession is granted during the course, the student will be provided options by RHL, or by the instructor in consultation with RHL, per [UBC's policy on Academic Concession](#).

Other Course Policies and Resources

Code Plagiarism

Code plagiarism falls under the UBC policy for [Academic Misconduct](#). Students must correctly cite any code that has been authored by someone else or by the student themselves for other assignments.

Cases of "reuse" may include, but are not limited to:

- the reproduction (copying and pasting) of code with none or minimal reformatting (e.g., changing the name of the variables)
- the translation of an algorithm or a script from a language to another
- the generation of code by automatic code-generations software

An "adequate acknowledgement" requires a detailed identification of the (parts of the) code reused and a full citation of the original source code that has been reused.

Students are responsible for ensuring that any work submitted does not constitute plagiarism. Students who are in any doubt as to what constitutes plagiarism should consult their instructor before handing in any assignments.

POLICIES APPLICABLE TO COURSES IN THE ROBERT H. LEE GRADUATE SCHOOL

Attendance

Excepting extenuating circumstances, students are expected to attend 100% of their scheduled class hours. Absent students limit their own academic potential, and that of their classmates, and cause unnecessary disruption to the learning environment. Students missing more than 20% of the total scheduled class hours for a course (including classes held during the add/drop period) without having received an academic concession will be withdrawn from that course. Withdrawals, depending on timing, could result in a "W" or an "F" standing on the transcript.

Punctuality

Students are expected to arrive for classes and activities on time and fully prepared to engage. Late arrivals may be refused entry at the discretion of the instructor or activity lead. Students arriving later than halfway through a scheduled class will be treated as absent for that class.

Electronic Devices

During online lectures, students are not permitted to use any electronic devices other than the primary one used for attending the online lecture (e.g. laptop or desktop). Only Zoom should be open during the online lecture unless an instructor advises the use of another program/website for an in-class activity. Feedback from students indicates that personal devices are the number one distraction from effective learning and participation in the online learning environment.

Citation Style

Please use the American Psychological Association (APA) reference style to cite your sources.

Details of the above policies and other RHL Policies are available at:

<http://www.calendar.ubc.ca/vancouver/index.cfm?tree=12,199,506,1625>

UNIVERSITY POLICIES AND RESOURCES

UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom.

UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available on the UBC Senate website at <https://senate.ubc.ca/policies-resources-support-student-success>.

Respect for Equity, Diversity, and Inclusion

The UBC Sauder School of Business strives to promote an intellectual community that is enhanced by diversity along various dimensions including status as a First Nation, Metis, Inuit, or Indigenous person, race, ethnicity, gender identity, sexual orientation, religion, political beliefs, social class, and/or disability. It is critical that students from diverse backgrounds and perspectives be valued in and well-served by their courses. Furthermore, the diversity that students bring to the classroom should be viewed as a resource, benefit, and source of strength for your learning experience. It is expected that all students and members of our community conduct themselves with empathy and respect for others.

Academic Integrity

The academic enterprise is founded on honesty, civility, and integrity. As members of this enterprise, all students are expected to know, understand, and follow the codes of conduct regarding academic integrity. At the most basic level, this means submitting only original work done by you and acknowledging all sources of information or ideas and attributing them to others as required. This also means you should not cheat, copy, or mislead others about what is your work. Violations of academic integrity (i.e., misconduct) lead to the breakdown of the academic enterprise, and therefore serious consequences arise and harsh sanctions are imposed. For example, incidences of plagiarism or cheating may result in a mark of zero on the assignment or exam and more serious consequences may apply if the matter is referred to the President's Advisory Committee on Student Discipline. Careful records are kept in order to monitor and prevent recurrences.

Academic Freedom and Students Studying from Outside Canada

During this pandemic, the shift to online learning has greatly altered teaching and studying at UBC, including changes to health and safety considerations. Keep in mind that some UBC courses might cover topics that are censored or considered illegal by non-Canadian governments. This may include, but is not limited to, human rights, representative government, defamation, obscenity, gender or sexuality, and historical or current geopolitical controversies. If you are a student living abroad, you will be subject to the laws of your local jurisdiction, and your local authorities might limit your access to course material or take punitive action against you. UBC is strongly committed to academic freedom, but has no control over foreign authorities (please visit <http://www.calendar.ubc.ca/vancouver/index.cfm?tree=3,33,86,0> for an articulation of the values of the University conveyed in the Senate Statement on Academic Freedom). Thus, we recognize that students will have legitimate reason to exercise caution in studying certain subjects. If you have concerns regarding your personal situation, consider postponing taking a course with manifest risks, until you are back on campus or reach out to your academic advisor to find substitute courses. For further information and support, please visit: <http://academic.ubc.ca/support-resources/freedom-expression>

COPYRIGHT

All materials of this course (course handouts, lecture slides, assessments, course readings, etc.) are the intellectual property of the instructor or licensed to be used in this course by the copyright owner. Redistribution of these materials by any means without permission of the copyright holder(s) constitutes a breach of copyright and may lead to academic discipline and could be subject to legal action. Any lecture recordings are for the sole use of the instructor and students enrolled in the class. In no case may the lecture recording or part of the recording be used by students for any other purpose, either personal or commercial. Further, audio or video recording of classes are not permitted without the prior consent of the instructor. Students may not share class Zoom links or invite others who are not registered to view sessions.

ACKNOWLEDGEMENT

UBC's Point Grey Campus is located on the traditional, ancestral, and unceded territory of the xwməθkwəyəm (Musqueam) people, who for millennia have passed on their culture, history, and traditions from one generation to the next on this site.

ONLINE TEACHING TOOL & REQUIREMENTS

This course will be taught using Zoom for synchronous classes and office hours.

For this course, you are required to use a Zoom account during synchronous classes and office hours. If you do not have a Zoom account, you can create one here: <https://zoom.us/signup>. Note: creating a Zoom account requires that you provide a first name, last name, and email address to Zoom. For privacy purposes, you may consent to using your existing email address and your real name. Alternatively, if you prefer, you may sign up using an alternative email address and an anonymized name that does not identify you (i.e. Jane Doe, jane.doe@email.com). If you have trouble creating an account, or accessing a Zoom session, please contact CLCHelp@sauder.ubc.ca. You will be required to provide the email address associated with your Zoom account in a Canvas quiz for identification purposes.

To help replicate the classroom experience, make sessions more dynamic and hold each person accountable, both students and instructors are required to have their cameras on during Zoom sessions. Students who require an accommodation with regard to the "camera on" requirement must contact their instructors in advance of the first class to discuss options. As professional graduate students, students are expected to conduct themselves professionally by joining sessions on time, muting mics when not speaking, refraining from using any other technology when in-session, attending in business casual dress (at a minimum), and participating from a quiet environment. Content from synchronous sessions will be selectively recorded per instructor discretion and made available to students on Canvas for a maximum duration of the course length. This is done to allow students the opportunity to return to lecture content to solidify learnings.

COURSE SCHEDULE

(Subject to change with class consultation)

Class	Date	Topic	Individual Assignment	Group Assignment
1	Jan 4 th (M)	Introduction to Customer Analytics Visualization and Tableau I	Individual assignment 1 Data.Table in R	
2	Jan 6 th (W)	Visualization and Tableau II		
6	Jan 11 th (M)	Customer Lifetime Value I		Group assignment 1 Tableau
7	Jan 13 th (W)	Customer Lifetime Value II		
3	Jan 18 th (M)	Linear Regression Predicting Transaction Value		Group assignment 2 Maru Batting Case
4	Jan 20 th (W)	Response Model Customer Acquisition and Retention I	Individual assignment 2 Book Transaction	
5	Jan 25 th (M)	Response Model Customer Acquisition and Retention II		
8	Jan 27 th (W)	Guest Speaker		Group assignment 3 Pilgrim Bank
9	Feb 1 st (M)	Customer Targeting & Segmentation		
10	Feb 3 rd (W)	Recommender System Collaborative Filtering
