

Chris Hobbs
President
Two Tall Totems
127 - 970 Burrard St
Vancouver, BC

April 4, 2016

Dear Chris,

I truly appreciate the time I spent working at Two Tall Totems. During my internship, I was given the opportunity to learn Swift and the iOS library by building the Study Together app with the other interns. You also believed in me enough to give me complete responsibility to organize the VanHacks hackathon and for that I am grateful. As you know, I am in my last year of university studying Computer Science and am seeking to gain another internship at Hootsuite as a Software Developer. For this, I am required to send a reference letter to accompany my application.

If you are agreeable to writing a letter of recommendation to Hootsuite on my behalf, I would appreciate it if you could comment on my following skills:

- Proficiency in Swift
- Ability to coordinate and work with people to ship products
- Written and verbal communication skills

I have enclosed an attachment of the intern application and a link to my LinkedIn profile to provide further information. The letter of recommendation will be included in my application package and can be emailed to me at jensen.alexis@gmail.com by April 6, 2016. If you are willing to write the letter and need anything else, please let me know.

Thank you for your time and good luck with the move.

Kind Regards,

Alexis Jensen
