## World Water Day, on 22 March Every year

---

**World Water Day** "is about focusing attention on the importance of water. The theme for World Water Day 2018 is 'Nature for Water' – exploring nature-based solutions to the water challenges we face in the 21<sup>st</sup> century.

Damaged ecosystems affect the quantity and quality of water available for human consumption. Today, 2.1 billion people live without safe drinking water at home; affecting their health, education and livelihoods.

Sustainable Development Goal 6 commits the world to ensuring that everyone has access to safe water by 2030, and includes targets on protecting the natural environment and reducing pollution." (World-Water-Day.Org)
