

VIRTUAL OPEN HOUSE

Mental Health and Substance Use career opportunities

Driven by a desire to help, at Vancouver Coastal Health (VCH), we collaborate and support one another in delivering the best possible care for patients, clients, residents and their families.

VCH mental health and substance use (MHSU) services are client-centred, goal-oriented, innovative, culturally safe, trauma-informed, involve families, and use psychosocial rehabilitation and harm reduction philosophy and practices. Clients and families can expect respectful, compassionate and competent care. Teams collaborate with clients and families to build on strengths, knowledge and interests to foster hope, growth, and empowerment.

With excellent health care benefits, fantastic locations and a supportive team environment, it's no wonder VCH is considered a leader in the health care field.

INFORMATION SESSION DETAILS

Join us for an informative and interactive information session about health care opportunities in MHSU services across VCH. Please ensure you have the latest version of Zoom prior to joining the session. Register by 9:00 a.m. on Friday, November 17, 2023.
