

**Subject Heading:** Want to make a difference for your patients? Come increase your pressure injury competencies and be eligible to win 1 of 3 \$100 Amazon e-gift card 📧 today!

Dear British Columbia Nursing Students,

Do you want to make a positive impact on your community? Do you want to improve your ability to prevent and manage pressure injuries, have the knowledge to care for them, and share your new capabilities with colleagues? You can do all this and have a chance to win 1 of 3 Amazon e-gift cards worth \$100 each! We want to know the effectiveness of this newly developed e-learning module in undergraduate nursing students.

You are invited to participate in the graduate thesis study “An E-Learning Module for Undergraduate Nursing Students on Pressure Injury Prevention in People with Darker Skin Tones” by Michael Fok, a Master of Science in Nursing student at the University of British Columbia, with their supervisor and principal investigator Dr. Suzanne H. Campbell. Click on the survey link below to review the consent information and see if you are eligible to participate. The consent information is also found in a document attached to this email.

Participation in this online e-learning module is completely optional. The data collected will only be analyzed for the purpose of this thesis study. Participating in the thesis study will remain confidential and has no connection with your nursing student status or grades. The resulting thesis study will be a public document and can be freely accessible on UBC cIRcle. This will likely be published by August 2024. Also, the research may be published in an academic journal.

Click the link below and thank you for your consideration!
