

Improving Patient Outcomes in Healthcare: Bridging Care Through Communication

"For Students by Students"

Date: November 5, 2024, 10:00 – 11:00 am, PST or
November 6, 2024, 13:30- 14:30 pm, PST

Topic: Team Communication

Overview: You are invited to attend this inter-active virtual teaching and learning session which will enhance healthcare students' knowledge of collaborative practice by exploring the topic of Team Communication in the interprofessional setting.

The session will:

- Provide an overview of the National Interprofessional Competency Framework
- Define Team Communication & relevance to healthcare settings
- Disseminate different communication tools
- Apply Communication Tools in a small group Case Study activity
- Discuss how these tools can be used in future practice settings
- Introduce the Learning in and From Team (LIFT) tool

By the end of this session, participants should be able to define, describe and apply the tools learned and adapt them to their workplace setting.

Presenters: This session is developed and delivered by Year 4 Bachelor of Science in Nursing students, Chantal Afonso, Emilia Palma & Jordan Welder, in partnership with the PHSA's Student Practice Education.

Registration: Learning Hub [Collaborative Practice/Team Based Care \(29782\)](#)

We hope you join us!
