

Improving Patient Outcomes in Healthcare: Building Bridges with Relationship-Focused Care

“By Students For Students”

Date: November 4, 2025, 1400 – 1500, PST or
November 5, 2025, 1000 – 1100, PST

Topic: Relationship-Focused Care

Overview: You are invited to attend this interactive virtual teaching and learning session which will enhance healthcare students’ knowledge of collaborative practice by exploring the topic of Relationship-Focused Care in the interprofessional setting.

The session will:

- Introduce the Canadian Interprofessional Health Collaborative Competency Framework
- Define Relationship-Focused Care and its relevance to healthcare settings
- Explore cultural safety, health literacy and shared decision making
- Apply relationship-focused care to a scenario in a small group case study activity
- Reflect on utilization in future practice

By the end of this session, participants should be able to define and apply the concepts from today’s learning and adapt them to their workplace setting.

Presenters: This session is developed and delivered by Year 4 Bachelor of Science in Nursing students, McKenna Galla, Mac O’Micael & Paul Freitag, in partnership with PHSA’s Academic Services team.

Registration: Learning Hub [Collaborative Practice/Team Based Care \(29782\)](#)

We hope you join us!
