

## **Job Posting for Colby Song's Application Package**

# **Job Title: Research Technologist**

Req Id 9945 - Posted 03/04/2015 - Research and Development - Canada

STEMCELL Technologies Inc. is a privately-owned biotechnology company based in Vancouver that helps power leading-edge life science research around the world. Scientists performing stem cell, immunology, cancer, regenerative medicine and cellular therapy research are among those who rely on our cell culture media, cell separation products, instruments, ancillary reagents and contract assay services. We create novel, useful, standardized products of unfailing quality and deliver them to more than 70 countries via our many regional offices plus distribution centres in Vancouver, Seattle, Grenoble and Singapore. Driven by our love of science and our passion for quality, we see ourselves simply as "Scientists Helping Scientists" – standing by our customers to provide outstanding products, technical support and training. We have approximately 500 science-oriented employees globally, including 100 PhDs/MScs, with most others holding a BSc or engineering degree. STEMCELL is proud to be the largest Biotechnology employer in BC.

This position is responsible for testing new and existing products, product components and competing products. They independently perform standard experiments including the appropriate controls. Research Technologist contributes to the general functioning of the R&D laboratory and maintains written records of laboratory procedures, experimental results and all lab work according to company standards.

### **DUTIES AND RESPONSIBILITIES:**

- Perform laboratory procedures as directed to modify experimental protocols to test identified variables
- Perform data analysis with guidance from supervisor
- Present data at R&D data meetings as directed by supervisor
- Increase knowledge of laboratory techniques and products
- Learn to trouble shoot standard experiments
- Assist with lab procedures as requested (e.g. inventory of supplies, waste disposal, safety measures)
- Assist with department operations as requested (e.g. filing reports, data entry)
- Comply with required QMS procedures including maintenance of a signed bound laboratory note book

### **QUALIFICATIONS:**

- A BSc. in Biology, Immunology, Biochemistry, Microbiology or a related relevant area plus 0-3 years of laboratory experience in a field related to STEMCELL products
- Documented laboratory, skills preferably with experience in an industry setting such as co-op study
- Experience in laboratory techniques such as cell counting, cell isolation, and cell culture highly desirable
- Knowledge of STEMCELL's products in not an absolute requirement but highly desirable
- Good verbal and written communication skills
- Documented ability to multi-task and work well in a team

This is an opportunity to work with highly motivated colleagues in a science-oriented, creative and dynamic environment. We offer a competitive salary, excellent benefits and significant career development opportunities.
