HI Amy  
thrilled you're putting your learning into action. Lets chat when we get back.  
Enjoy the rest of your summer.

Hi Janet,

I hope your summer is going well and you are getting some relaxation.

I have just finished up a course at UBC about technology in education. I did an inquiry project about integrating technology in primary classrooms. I think many primary teachers are hesitant about using technology with their students, and I would like to encourage them to use it in innovative and meaningful ways (NOT "doing the same thing we were before, but now it's on a screen").

I am hoping in the fall you can help me set up an online collaboration group. Part of my project was creating a workshop, which I'm willing to give after school one day to help launch the group.

We can chat about it in the fall, I just wanted to let you know while it's fresh in my mind. Enjoy this gorgeous weather!
