

CPSC 436I - Assignment 6

DUE DATE: **Tuesday, July 28 (4PM)**

- Submit this assignment by adding your document (PDF format) to your existing assignment repo

Resume!

For the sixth, and final assignment, you'll be creating a job resume. This will be based off of content presented during the sixth workshop. We understand that many of you may have an existing resume, so this is a great chance to either create a brand new one, or take your existing resume, and modify/update it.

We're expecting the following:

- 1) 1 page MAX!
- 2) Your name and contact details
- 3) At least three sections that cover:
 - a) Education
 - b) Work experience (try your best to use examples that would be relevant to a tech-related job)
 - c) Technical skills/experience + Side projects
- 4) Your project from this course!
- 5) It should be a PDF.

You should be ready to show your resume to a TA during your first week lab, and should be ready to answer questions about it.

HAVE FUN!!!
