

Department of Curriculum and Pedagogy

EDCP 374A and 377A (3)

Curriculum and Pedagogy in Design and Technology I & II

Course Content from

Advanced Teaching Methods for the Technology Classroom

Preface

 Teaching Technology

 Organization of the Book

Part I— Analyzing and Designing Technology-Based Instruction

Chapter 1. Communicating and Planning for Instruction

 Characteristics of an Effective Teacher

 Communication

 Audience Analysis

 Preparation

 Practice

 Delivery

 Feedback

 Reflection

 Presentation Media and Communication Technology

 Demonstrations

 Lesson Plans

 Instructional Objectives

 Cognitive Domain: Knowing

 Affective Domain: Feeling

 Psychomotor Domain: Doing

 Projection and Reflective Practice

Chapter 2. Organizing Knowledge for Instruction

 Intelligence

 Gardner’s Multiple Intelligences

 Sternberg’s Triarchic Theory of Intelligence

 Knowledge

 Cognitive Skills: Reasoning

 Deductive Reasoning

 Inductive Reasoning

 Articulating Knowledge

 Procedural Knowledge- Know how

 Propositional Knowledge- Know why, what, when, who and where

 Integrating Knowledge

 Organizing Knowledge for Instruction

 Procedural Knowledge: Procedure Sheets

 Propositional Knowledge: Images

 Mind Maps

- Schematics
- Taxonomy Trees and Systems
- Timelines, Tables, Charts and Graphs
- Scientific and Technical Visualization
- Propositional Knowledge: Information Sheets.....
- Technological Literacy Dispatch
- Projection & Reflective Practice.....

Chapter 3. Feelings, Values, Ethics and Skills.....

- Technology and Emotions
- Emotional Labor
- Emotional Intelligence.....
- Technology, Emotions and Skills.....
- Technology, Values and Skills
- Models of Moral Development
- Technology and Ethics
- Skill Acquisition.....
- Enhancing Skill Acquisition
- Projection & Reflective Practice.....

Chapter 4. Instructional Methods and Learning Styles

- Instructional Systems.....
- Teaching Methods
- Controversial Issues.....
- Values Clarification
- Class Discussion
- Cooperative Learning or Dyads.....
- Debriefing.....
- Research Methods
- Teaching Styles
- Personality Types
- Learning Styles
- Projection and Reflective Practice.....

Chapter 5. Creativity and Ingenuity, Design and Problem-Solving.....

- Creativity, Imagination and Ingenuity.....
- Design
- Design and Problem-solving
- The Ecology of Design and Problem-solving
- Life Cycle Assessment, Resource Stream and Footprint.....
- Disclosive Analysis
- Designerly Thinking & Laws of Media.....
- Basic Causes
- Quotidian Deconstruction
- Reverse Engineering.....
- Sociologics.....
- Systems Analysis.....
- Technology Assessment
- Technological Forecasting.....
- Design Briefs
- Fasten(at)ing Technology—Paper Clips.....
- Projection and Reflective Practice.....

Part II— Analyzing and Designing Technology-Based Curriculum

Chapter 6. Learning Theory, Technology and Practice

Head, Heart, Hand and Feet
Feeling and Knowing Issue from Doing
Practice Draws From the Disclosive Power of Technology.....
Dewey's Theory of Experience.....
Kolb's Theory of Experience
Dale's Cone of Experience.....
Modes of Learning with Technology
Agency, Embodiment, Technology and Determinism
Learning Theories.....
 Behaviorism.....
 Piaget and Cognitive Development
 Constructivism.....
 Situated Cognition
 Constructionism.....
 Activity Theory.....
 Distributed Cognition
Projects
Projection and Reflective Practice.....

Chapter 7. Justifying Technology Studies

Significance of Technology.....
Technological Literacy.....
Technological Capability.....
Critical Technological Literacy.....
Gender Equity
Character Values
Integration
Employability Skills.....
Tech Prep and Technical Trades
Appropriate Technology and Ecodesign
Craft, Design and Engineering
Projection and Reflective Practice.....

Chapter 8. Technology Content, Processes and Standards

Technology Content
 Technology Content and Standards.....
 Technology Content, Standards and Benchmarks
The Disciplines of Technology
Task Analysis
Processes as Content.....
Universals of Technology?.....
Imperatives of Technology Content.....
Projection and Reflective Practice.....

Chapter 9. Curriculum and Instructional Design

Curriculum Design and Theory.....
Instructional Design and Theory
Principles of Curriculum and Instructional Design.....
Evaluating C&I Products.....
Projects
Units
 Normative Units.....

Modules
 Delivery Systems
 Course Design: Putting it All Together
 Copyright for C&I and Academic Freedom
 Projection and Reflective Practice.....

Part III— Implementing and Evaluating Curriculum & Instruction

Chapter 10. Assessment and Evaluation

Assessment in Technology Studies
 Projects
 Authentic Assessment
 Portfolio Assessment
 Performance Assessment
 Criterion-Referenced Assessment and Rubrics
 Problem-solving.....
 Tests and Measurements.....
 Constructing Effective Tests.....
 Grading, Marking and Reporting
 Grade Inflation.....
 Questionnaires and Scales of Technological Literacy.....
 Evaluation
 Projection & Reflective Practice

Chapter 11. Classroom Management, Facilities Design and Safety

Components of Professional Practice.....
 Code of Ethics
 Managing Students and Facilities in Technology Studies.....
 Setting the Tone.....
 Humor
 Gender, Sexuality and Diversity.....
 Discipline with Dignity
 Critical Incidents of Behavior
 Classroom Incivilities
 Violence, Bullying and Hazing.....
 At-Risk and Special Needs Students
 Learning Disabilities.....
 Assistive Technology.....
 Safety
 Liability.....
 Class Size.....
 Facilities Design and Management
 Facility Evaluation.....
 Ergonomics of Labs and Workshops.....
 Budgets and Inventories
 Projection & Reflective Practice.....

Glossary
