

## **INK CALL FOR ARTICLES:**

The College for Interdisciplinary Studies in conjunction with CFIS Graduate Student Association has launched a non-academic, student-run journal driven to synergize UBC's interdisciplinary community to empower and democratize knowledge, impact change, and inspire the interdisciplinary spirit. We strive to liberate innovative and cutting edge information from academic elitism. We occupy a unique niche where creativity builds bridges—students can showcase their work, and engage in innovative discussion that address real world problems. We encourage, recognize, and reward passionate students by offering a chance to get published, and participate in knowledge translation.

### **The journal is now accepting articles for the 2<sup>nd</sup> Issue: Era of Genomics:**

Choose your own genomics topic: 750-1000 words, or write about one of the topics below:

- i. Gene therapy
- ii. Personalized medicine
- iii. Genetic diseases
- iv. Epigenetics
- v. GMO
- vi. Evolution of genetic diversity
- vii. Ethics and genetics
- viii. DNA information storage
- ix. Forensics

### **We are also accepting: Topics of controversy:**

750-1000 words. These articles should provide a survey on a hot-topic or a controversial issue currently studied in your realm.

INK will feature work from a broad spectrum of disciplines, including both the soft- and hard-sciences. Please eliminate jargon from all articles, as they should be understandable without prior knowledge of the field.

If you are interested in contributing to INK, please contact us at [ubc.cfis.journal.editorial@gmail.com](mailto:ubc.cfis.journal.editorial@gmail.com). We look forward to receiving your article requests, and are happy to answer any questions.

Thank you,

The INK Editorial Board
