Tell the story that I want to talk about today
of not happened last year and I was
in Ecuador I was traveling there with a friend of mine
com and asserted a summary of that tracked the high school bowls and
Gu learning experiences that had along the way
I am
still had traveled into GL
on keating's the capital of Ecuador
and it was a great experience we've got shuttled to be a hotel around their waists some
issue of safety because of course you nuts but to take any specific doubt
That have a
that don't have a wider yellow sticker still no unregistered Of between organized are
shuttled four and so we were concerned about that
, we were shuttled to street to our hotel and we've managed to
sleep better stick pretty well
run we'd been traveling all dates so it was for proximately 2020 hours of troubled so by the
time it got to tell you were exhausted around and we just collapsed it
and just look at eight and the first day we had some announced a really great work of key ON
lee and went to the equator where we had a few science experiments done with us so complex that will
try to balance in a grid of the
Quakers but speed veritable to add an inch do was great because
you better balance the egg on a nail it was a difficult task but you know you get a little certificated
manage to direct his excellent
whether the interesting things about the equator is of course of many people know about
the affects that's a young north of the equator
du
Atwater will travel down the drain in a
in one direction either clockwise a counterclockwise and then set the equator

eight doesn't the upswept bomb at what I didn't realize was that of course all it takes is about you know what foot north of the equator 1 foot of the bit quicker structure to get to act which was really really interesting

so it was a lot of fun at first a wheat rides a lot of a authentic food there which was late and then but Everex they were actually joining our fault workgroup to go into the Amazon this was by far the best party experience when we went into the Amazon we were connected with the nature and the animals and Iraq should stay in

a native persons called which was fantastic of the had to school each hold it was felt sort of like camping they offered as the guest host of bleach was sort of reminded me of cabins in the woods

a Buddy Kenneth

of the quibble it and so was really nice it was this beautiful rustic

the rustic home and gets tense week that bear in their property which the cast it gave a day had this great meal service a glitch was essentially them in all getting as SP screeched rishel meals every night

and then during the day we would have our activity so what if activities

was to happen

to go a

hiking into the woods added to their property as well and we would hike up waterfalls cat got soaked we had to wear the Siew trade goods

but of course were hiking or falls were jumping in the water and we just got so soaked but it was a lot of fund the other

piece was that we

went to score on Whitewater rafting and the first by the Whitewater rafting is really just learning how to and you know

how to turn out to listen to the instructions that are are being told to you while you're on the radar of baton of course the second half we got

to be more creatively would stand on the rid of the voters say on that little about just read a hold on for dear life by on the battle right at the

threaded about a enter a stock to fall off so that was a lot of fun and the result rainy that an old choppy on the water to soak

it up in the safest thing but it was a lot of fun and

we've really enjoyed a time there now be a most interesting part or what I think is the most

interesting part of the jury was on the way back to Quito so we'd

left the Amazon week left of the time of Kenya and we were coming back on their way to Quito was there was a landslide on the road and the

traffic was backed up for hours and hours and hours and there's really no way to turn around

it was just a Tulane road were of this huge tour bus

surrogate robust up and it was a

bus for locals and we've had we've got tickets for does well so we're on the spiced with a bunch of other locals and tried to

get back to key up and the two lane road does not allow for these big bass is to turn around on

this small to late round ever by the fact that we had cars below the head of a step behind us

and we notice that there's no traffic coming through the slats Utley there's no less a cover the entire road and there was machinery trying

to get these rocks at the way they were not fit all rocks

you got there it was just huge so we've stood there for awhile that we were there for about two more 3 hours and and we walked to the

fried solve the problem was sought B construction and cruel and we decide to wait a couple more hours

but at the point of around 4:00 PM we had to really make the call of what we're gonna do we only had a couple options we could hitch a ride

back to tenure to try and to the bob way around through a different set of roads to get back to

Keogh and addresses this would take it quite a few different hours and none of it

would've been guaranteed

and the other option was actually to climb over the landslide

and tried to ride to Quito are at least to the nearest bus station on the other side

and so that is what we did we bides as a group there's about upset us who decided

that that was the older bearded climb over the landslide hitch a ride and drive to the nearest bus stop and if we did and managed hitch a

ride would be walking there so we've climbed over as a group some people were looked shaky because we could see that the rocks

were sort of falling and were stepping on them just a small pebbles but some big blocks were OK we got our boots muddy we got our luggage muddy but we managed to climb over it and then we walked all the weight

of course there were cars back logged on the other side as well and that the very last rock in that lineup after we asked up just about everybody a set that they would take us to the nearest town where we could hitch a ride to the cheers bus stop so that is what we get the other issue here was a noble for a judgment or die too harshly was there was no signal like there's no phone signal in the mountains there was no mobile phone I know nothing so she wouldn't normally than try to contact somebody to get us out of there but we didn't have any connection

com so it was deathly Cal learning lesson for them as well to do to make its satellite phone or something so that way if there was any issues during these periods of time that they've got to be able to contact somebody around anyway so after a couple hitched rides to the tourist bus station a week manage to get into town and around 8:00 PM where we were stuck to get there at around 1:00 PM I'm so it was a huge delay but we're just happy that we were there that we were stashed and that in the end we went and got some

guts and food update your stress traps so that was sort of habit of candidate was a bit of a surprise but was a lot of fun
