Hiring Manager
Datakite Inc.

Dear Hiring Manager:

Please consider my application for a software engineer position at your company, as advertised on July 15 on UBC Career. I will graduate from University of British Columbia on May 30 next year with an Associate of Arts degree in computer science.

As you can see from my enclosed resume, I have two internship experiences related to software engineer. In the recent one, I work as an backend developer in Bytedance, which is the mother company of Tik Tok. In this experience, I use Go and Python to build a service to help advertisers to batch select their target advertising audience and I use the RPC framework to request data from other services which fulfill the need of the job.

As an owner of a small website, I'm well aware of full stack application development who are familiar with Javascript . For example, I deploy my website on AWS, I build features, design and implement APIs on my own and I am experienced in database development for storage user data.

I have worked hard to hone my programming skills. My experience, education, and personality have prepared me to work well with others and to respond creatively to challenges, crises, and added responsibilities.

If my background meets your needs, please feel free to phone me at (236)989-6338 or email at zhoumulin999@gmail.com.

Sincerely,
Yusen Zhou
