Software Development Engineer - 2020 (Canada)

Job ID: 908747 | AMZN CAN Fulfillment Svcs, ULC

DESCRIPTION

Do you want to solve business challenges through innovative technology? Do you enjoy working on cutting-edge, massively scalable services technology in a fast-paced team environment? Do you love working on industry-defining projects that move the needle?

At Amazon, we hire the best minds in technology to innovate and build things to benefit our customers. The intense focus we have on our customers is why we are one of the world's most beloved brands – customer obsession is part of our company DNA. Our Software Development Engineers (SDEs) use cutting-edge technology to solve complex problems and get to see the impact of their work first-hand.

The challenges SDEs solve for at Amazon are big and impact millions of customers, sellers, and products around the world. Our path is not always simple, so we are selective about who joins us on this journey. There is a certain kind of person who takes on software development challenges at Amazon – someone who is excited by the idea of creating new products, features, and services from scratch while managing ambiguity and the pace of a company whose ship cycles are measured in weeks, not years.

If this is you, come build the future with us!

Note: By applying to this position, your application will be considered for all locations we hire for in Canada including, but not limited to: Vancouver, BC; Toronto, ON; Winnipeg, MB.

Key Job Responsibilities

- · Collaborate with experienced cross-disciplinary Amazonians to conceive, design, and bring to market innovative products and services
- · Design and build innovative technologies in a large distributed computing environment and help lead fundamental changes in the industry
- \cdot Create solutions to run predictions on distributed systems with exposure to cutting edge technologies at incredible scale and speed
- · Build distributed storage, index, and query systems that are scalable, fault-tolerant, low cost, and easy to manage/use

Applications are reviewed on a rolling basis. For an update on your status, or to confirm your application was submitted successfully, please login to your candidate portal. Please note that we are reviewing a high volume of applicants, and appreciate your patience as we review applications for future Amazonians!

BASIC QUALIFICATIONS

- · Enrolled in or received a Bachelor's Degree in Computer Science, Computer Engineering, or related fields
- \cdot Experience in one of the following languages: Java, C++, or C

PREFERRED QUALIFICATIONS

- · Previous technical internship(s)
- \cdot Experience with distributed, multi-tiered systems, algorithms, and relational databases
- · Experience in optimization mathematics such as linear programming and nonlinear optimization
- \cdot Ability to effectively articulate technical challenges and solutions
- · Adept at handling ambiguous or undefined problems as well as ability to think abstractly
