

stripe JOBS

Backend / API Engineer, Cards Expansion

Backend engineers build the core of Stripe products, services and APIs in spectacularly robust fashion.

← ROLES AT STRIPE

 Seattle

 Full time

 Payments infrastructure

APPLY NOW

As a platform company powering businesses all over the world, Stripe processes payments, runs marketplaces, detects fraud, helps entrepreneurs start an internet business from anywhere in the world, builds world-class developer-friendly APIs, and more. Stripe's backend engineers work on the business logic for all of that. As a backend engineer, you will build and expand APIs and services and work with our partners to launch new markets, payment methods, and capabilities.

We have backend engineers in almost every team across Stripe, and in that role, you'll be making some of the most significant decisions for the company. You'll get to work with other engineers to build delightful features that span various parts of the system, as well as our business, sales and operations teams to understand and solve our users' pain points.

The Acquiring Cards Expansion team is working to expand Stripe's reach worldwide. We build software to process hundreds of billions of dollars in payments annually. We believe the best way to do this is to build excellent engineering platforms, while keeping focus on the impact we're having to our users worldwide.

You will:

Architect and design engineering projects

Communicate with other engineering teams across Stripe's global offices

Design, build, and maintain APIs, services, and systems across Stripe's engineering teams

Mentor engineers earlier in their technical careers to help them grow

You have:

At least four years of professional software development experience

Either a Bachelor's degree in a technical field involving coding (e.g., Computer Science, Engineering, Physics, Mathematics) -or- equivalent technical experience

Technically lead projects which have involved multiple engineering teams

Worked in a variety of different platforms, in both high-level and low-level languages, and maybe even done front-end work.

Nice to have:

Have helped grow a new team or product, and are excited about help making a great team environment.

You should include these in your application: A resume and/or LinkedIn profile.

We look forward to hearing from you

APPLY NOW

At Stripe, we're looking for people with passion, grit, and integrity. You're encouraged to apply even if your experience doesn't precisely match the job description. Your skills and passion will stand out—and set you apart—especially if your career has taken some extraordinary twists and turns. At Stripe, we welcome diverse perspectives and people who think rigorously and aren't afraid to challenge assumptions. Join us.
