Interview Questions

1. What is your field of research?
2. What sorts of skillsets (computational and non-computational) do you employ?
3. What sorts of skillsets (computational and non-computational) do you look for in a potential student researcher (undergraduate, graduate)?
4. Do you think areas like computer science, and computer science relevant skillsets are applicable to your field at present? How about in the future?
5. How do you anticipate your field changing in the future (in terms of techniques, approaches to experimentation, and major questions)?
6. What advice would you give to a student interested in pursuing research (in terms of skillsets to pursue)?
