To get the best candidate experience, please consider applying for a maximum of 3 roles within 12 months to ensure you are not duplicating efforts.

Our Futureforce University Recruiting program is dedicated to attracting, retaining and cultivating talent. Our interns and new graduates work on real projects that affect how our business runs, giving them the opportunity to make a tangible impact on the future of our company.   With offices all over the world, our recruits have the chance to collaborate and connect with fellow employees on a global scale. We offer job shadowing, mentorship programs, talent development courses, and much more.

Job Category
Intern

Job Details
This is your time to shine. Our software engineering interns are considered full-time employees by their peers. In fact, you will be expected to contribute right away as a member of our Engineering teams for future releases. As the world leader in enterprise cloud computing, we release 3 new versions every year with close to 100 new features each release. You will write code that reaches millions of subscribers who use a number of our applications ranging from Marketing Cloud, Service Cloud and Security to just name a few. Additionally, you will work on our automated testing infrastructure and craft the tools that provide real-time monitoring of our service. With such a quick turnaround, we don't want our interns to sit on the sidelines and enjoy the view— we want you to change the way our customers connect their business to the world!

As a Futureforce intern, you will not only get to contribute to the meaningful work our teams are doing, but you will also have the opportunity to interact with senior executives and network with a number of employees at Salesforce. In addition to these impactful opportunities, ensuring that you get to participate in a number of events outside of your day-to-day duties is something that is top of mind for us. Throughout the summer, you will get to attend reoccurring "Lunch and Learns" where you will hear from a number of different representatives from the business about their career paths, attend events that take place outside of the office such as local Baseball games and finally, you will have the opportunity to give back to the community through a number of organized volunteer events. At Salesforce, we care deeply about the work that you do as an intern and additionally want to ensure that you are provided ample opportunities to create meaningful connections with other Salesforce employees as well as other students from across the country during your summer in the office.

Key Responsibilities:

- Work under the direction of software architects and senior developers on a project that you will get to present to other interns and Salesforce Developers
- Work with your team members on timely and relevant projects that may be included in a future software release
- Contribute to our suite of automated tests and testing infrastructure

Required Skills:

- Enrolled and working towards obtaining a BS or MS in Computer Science or related field. Please note that in order to be eligible for an internship, we require that you be returning to school the following quarter/semester to work towards completing your degree
- Must be attending a University in North America
- Academic or professional/internship experience working in a professional coding setting is a plus
- Understanding of object-oriented programming/design
- Strong understanding of CS fundamentals and how to apply them to code
- Understanding of algorithms and data structures and how to efficiently implement them into a solution
- Ability to produce clear, efficient and concise code

Desired Skills:

- Team-player with the ability to work effectively and efficiently with others
- Strong analytical and problem-solving skills
- Commitment to putting quality first and delivering quality solutions
- Be a self-starter and possess a strong sense of self-motivation

About Us

Founded in 1999, Salesforce is the global leader in Customer Relationship Management (CRM). Companies of every size and industry are using Salesforce to transform their businesses, across sales, service, marketing, commerce, and more by connecting with customers in a whole new way. We harness technologies that can revolutionize companies, careers, and, hopefully, our world.

Salesforce is built on a set of four core values: Trust, Customer Success, Innovation, and Equality. By making technology more accessible, we're helping create a future with greater opportunity and equality for all. This has taken our company to great heights, including being ranked by Fortune as one of the "Most Admired Companies in the World" and one of the "100 Best Companies to Work For" eleven years in a row, and named "Innovator of the Decade" and one of the "World's Most Innovative Companies" eight years in a row by Forbes.

There are those who choose to work with the best and brightest. And then, there are those who want to do more than just a job. They are the ones improving lives, not only their careers. Having an impact now instead of later. Doing something that's so much bigger than themselves, an industry, and their company.

We believe everyone can be a Trailblazer. Join Salesforce and discover a future of new opportunities.

Dear Recruiter,

Please consider my application for a Software Development Engineer Internship role at your company. I am a hard-working college student (3.5 GPA, Bachelor of Science in Computer Science) currently attending University of British Columbia. During the course of my academic career, I also managed to accrue nearly 3 months of work experience as a Chinese Teacher.

As you can see from my enclosed resume, I had a project experience with Chat Room web application development. The Client-side implemented by Javascript with the functionality of reading and updating the list of chat rooms from the server via AJAX requests, following a Model-View-Control pattern. The Server-side implemented by Node.js. I am also familiar with the skills needed for Front-end development like CSS and JQuery. By doing this project, I gained some experience working with SQL and NoSQL databases as well.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me at 861-890-847-3601 or via email at 1416518573@qq.com to arrange for a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Shuge Luo

Paul Carter

Dear Paul

I hope this letter finds you well. I quite enjoyed the lectures you provide to us, and I learn a lot from the last few months.

Recently, a summer internship role as a Software engineer in Salesforce has crossed my path, and I certain this role will help me gain the first-hand experience and gain foothold into the IT field. I would greatly appreciate if you could write a letter of reference for me in your capacity as my professor teaching CPSC210.

As you can find in the attached cover letter and resume, I am capable to deliver projects and have relevant strong code fundaments. The job requires an understanding of object-oriented programming/design which I learnt from CPSC210 including Java and different design pattern.
I also have a strong understanding of CS fundamentals and how to apply them to code. From CPEN400A, I got an understanding of algorithms and data structures and how to efficiently implement them into a solution. The implementation is the chatroom app which you can find at my Github.

I have included my latest resume which will bring you up to date with my recent project achievement.

If you would be comfortable to endorse me for this job, please email me on 1416518573@qq.com. If you require more other information for this reference letter, feel free to contact me. Thank you in advance for your time and consideration.

Sincerely,
Shuge Luo
