Subject: Software Engineer Intern Position – Samantha Lee

Dear Hiring Manager:

Please consider my application for a Software Engineer Intern position at Figma, as announced on the Lever website. I am a 4th year Bachelor of Computer Science student who will be graduating from University of British Columbia in December 2022.

Pursuing a career in software development, I am currently employed as a full stack engineer intern at Article, and will be working there until December 24th. During this 8-month internship, I developed new features for the company website using Java and JavaScript. Through this experience I gained a strong knowledge of CS fundamentals, including data structures and Object-Oriented Programming.

After working as a software engineer and musician, I developed strong teamwork and communication skills to collaborate effectively with co-workers. I am able to complete tasks in a thorough detailed manner, using efficient time management and organization skills. Apart from having a strong work ethic, I enjoy working with new technology and am confident in my ability to learn new software quickly.

Thank you for considering my application. Should I be eligible for the position, please email me at [leesamantha@live.com](mailto:leesamantha@live.com).

Sincerely,

*Samantha Lee*
