**JOB POSTING INFORMATION**

<b>Placement Term:</b>	2022 - Winter
<b>Job Title :</b>	W22 Software Development Engineer - CHC 138327 E2
<b>Position Type:</b>	Co-op Position
<b>Job Location:</b>	Richmond, BC
<b>Country:</b>	Canada
<b>Duration:</b>	8 months

solutions. You will work closely with your fellow developers and project management to implement high quality software products.

Change Healthcare values creativity and innovation. Your skill in programming is matched by your willingness to take on new challenges as we continuously expand the scope of Change Healthcare products and services. You are required to be a self-starter, team player, quick learner, very efficient in your daily activities and not afraid of challenges.

You will be developing application software implementing backend services, web services, and SPA web clients. The work will require you to analyze requirements and designs to develop and unit test new features. You will also be troubleshooting customer reported issues and correcting errors in releases of the Change Healthcare Workflow software product suite.

The work will provide direct experience in using enterprise tools for application lifecycle management, e.g., defect management, requirement management and code management. As a medical device manufacturer, the product development work operates under the purview of various quality systems standards and regulations. You will be exposed to and received basic training on quality standards like ISO 13485:2003 and ISO 14791:2007. In addition, the software development will build up your domain knowledge on medical imaging systems - a critical component in delivery of patient care.
