Steve Wolfman  
BCS Director  
University of British Columbia  
Vancouver, BC V6T 1Z4

Dear Professor Wolfman:

Here is my report, Impostor Syndrome in the BCS Program: A Formal Report on Helping BCS Students Transition. In preparing this report, I've learned a great deal about the experiences and thoughts of current Bachelor of Computer Science (BCS) students, and I believe my information will help future students as well. Thank you for your guidance and encouragement throughout this process.

Although excited to enter start their BCS, many students feel overwhelmed by the program and seem interested in receiving more information upon enrolling in UBC. The three particular areas new students would like to learn about are: how to effectively schedule courses, what is involved in building coding projects, and what learning resources are available.

Learning more about the three areas mentioned above will help students feel more competitive in the competitive BCS program, and be better prepared for their future co-op positions.

I've enjoyed my work on this project, and would be happy to answer any questions. Please contact me at [madeleinemleroux@gmail.com](mailto:madeleinemleroux@gmail.com) anytime.

Sincerely,  
Madeleine Leroux
