RE: Entry-level Engineering Position

To Whom It May Concern,

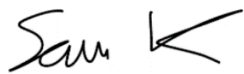

I am excited to apply for the Entry-level Engineering positions you are advertising. As a hard-working and enthusiastic near-graduate mechanical engineering student, the positions you have offered are exactly what I am looking for.

I will be graduating in April 2019 with a bachelor's degree in Mechanical Engineering, with the addition of having taken master's level courses in Naval Architecture, specifically in advanced ship structures, and advanced hydrodynamics. In preparation for post-graduation employment I am studying for the Fundamentals of Engineering (FE) exam and hope to complete this prior to graduation.

My background in the marine environment has taught me the skills to be an excellent communicator, both written and in-person. I am proficient in many different engineering software packages including AutoCAD, Rhino, Inventor, Solidworks, MATLAB, and the full Microsoft Office suite. Other software packages I currently have a working proficiency in include STAR-CCM+.

My career path is focused on the marine industry, and I have worked in the marine industry for 14 years, with positions including Marine Fitter, Project Planner, and Hull Surveyor. I look forward to discussing employment opportunities with your firm soon.

Regards,

Samuel Kobierski
