Subject: Software Engineering Coop with Snap inc.

Dear Mrs. Spencer,

I am submitting my candidature for a Software Engineering Coop at Snap Inc. My passion is to work with extremely talented people and collaborate to make products that would make an immediate impact. I enjoy developing applications to solve immediate problems or projects I want for everyday people. For example, I have developed an exercise log application using Java to keep myself in check for my personal fitness goals. Applying to Snap Inc., I hope to develop small and cute capabilities for all users of the application.

Most of my personal projects always come from a problem I want to solve, and it is by solving that problem that I grow and develop my coding abilities. I always break down the problem into smaller pieces and work my way up using and learning the necessary tools to complete it. For example, by working on my Interactive trading bot, I have learned about Java programming, requests, multi-threading and GUI programming. I have an excellent work ethic and I enjoy solving difficult challenges and learning from them.

I truly hope to make a solid contribution to a team at Snap Inc., and I am always available for an interview.

Thank you.

Best,

Kelly Kim
