Subject: *Inquiry about a Software Summer Internship at Amazon*

Dear Hiring Manager,

I am a first-year undergraduate student from the University of British Columbia looking to secure a Software Internship position this summer. I graduated in 2020 with a degree in Biology and Psychology at McMaster University but decided to pursue a second degree through the accelerated computer science program because of my strengths in problem solving and logical thinking. I am interested in a position at Amazon because of the extraordinary work culture and outstanding reputation of excellence and prestige in software design and systems management. As a detail-oriented individual coupled with the ability to adapt and learn quickly, I believe I have the knowledge and skill set to allow me to contribute toward the success of this company.

I have excelled in all computer science courses taken to date while earning personal recommendations from professors. I have a working knowledge of JavaScript and C++ and have created several personal projects including a bookshop inventory system and a memory and sound game. Furthermore, at my previous internship at Salesforce, I was able to develop my skills in web development and technical work by collaborating with peers on projects and furthering my understanding in databases, back-end code, front-end code, testing, design, and deployment. In a short span of 10 weeks, I optimized the functionality of various programs by thinking abstractly and using critical problem-solving skills.

Characterized by my previous employers as organized and reliable, I believe my strongest value is being an enthusiastic quick learner. The opportunity to work on an impactful project and help solve some of the most complex technical challenges today is of great interest to me and demands exactly the skills and knowledge I possess. I truly believe that I would be a worthy addition to your software team and look forward to hearing from you to further discuss my qualifications. To arrange an interview, please contact me through email at varneega.theva10@gmail.com. Thank you for taking your time and consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Varneega' with a stylized flourish at the end.
