Subject: Feasibility Analysis of Implementing Ultrasonic Scaling at ABC Pediatric Dental Group.

Dear Mr. Schalkwyk:

I have completed my report to evaluate the feasibility of integrating ultrasonic scaling at ABC dental group located in Winnipeg, Manitoba. The report is attached.

The report has an outline of deficiencies currently present at ABC dental group resulting primarily from employing one form of scaling by dental providers. Further, outlined in the report is a detailed research-based plan to tackle these deficiencies and improve dental provider satisfaction along with comprehensive patient care. I think you will find overall my plan to be realistic and efficient to enable ultrasonic scaling at ABC dental group.

I very much look forward to working with you on this plan. If you have questions about the report, please contact me at Kahlon20@ubc.ca or 123-567-3456. I will be available and happy to help.

Best,

Lovin Kahlon
Registered Dental Hygienist
