

## GIS survey

Geographical Information Systems (GIS) are used to capture, analyse, manage and visualise spatial data in both 2D and 3D. The few questions below will be used to determine how familiar you (students) are with GIS, so that we (teaching staff) can continue to improve and develop classes in the geosciences.

**1. GIS tools can be useful for understanding different concepts in the geosciences**

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Strongly disagree	Disagree	Neutral	Agree	Strongly Agree

**2. Which of the following GIS software have you heard of? Circle all that apply.**

ArcMap      SAGA      QGIS      GoogleEarth

**3. Which of the following GIS software have you had experience using? Circle all that apply.**

ArcMap      SAGA      QGIS      GoogleEarth

**4. Would you find it helpful for GIS to be used within geoscience courses in:**

**a. Lectures**

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Not at all	No	Maybe (unsure)	Yes	Very useful

**b. Labs**

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Not at all	No	Maybe (unsure)	Yes	Very useful

**c. Independent Project(s)**

<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Not at all	No	Maybe (unsure)	Yes	Very useful
