

Module III

Group Check-In Questions

March 16 & 23 2011 at 12pm in CEME 1210

We will have a brief group check-in discussion on March 16th and 23rd regarding the following questions. If you have other issues or interesting information about the project to share with the class, this is also a good time to bring these issues up.

1. What is something your group accomplished or learned this past week?
2. What are some things your group is planning on completing in the next week?
3. What challenges, if any, has your group run into this week? Have you found a way to overcome them? How?
