

Solving:

$y \geq 2x - 3$

→ Test (0,0)

$$0 \stackrel{?}{\geq} 2(0) - 3$$

$$0 \geq -3$$

$\Rightarrow y < -\frac{1}{3}x + 2$ → Test (0,0)

$$0 \stackrel{?}{<} -\frac{1}{3}(0) + 2$$

$$0 < 2$$

Solving quadratic Inequalities
 \Rightarrow Graphically or Algebraically

$$x^2 + 7x + 12 < 0$$

$$x^2 + 7x + 12 > 0$$

$$(x+3)(x+4) > 0$$

x intercepts at: -3 and -4

Solving Algebraically

$$\underline{x^2 - 13x + 30 > 0}$$

Find the zeroes!

$$(x - 10)(x - 3) > 0$$

ZEROES AT $x = +10$ and $x = 3$

Check 0

$$0^2 - 13(0) + 30 > 0$$

$$x < 3$$

Check $x = 12$

$$12^2 - 13(12) + 30 > 0$$

$$144 - 156 + 30 > 0$$

Check $x = 5$

$$5^2 - 13(5) + 30 > 0$$

$$25 - 65 + 30$$

$$-10 < 0$$

$$x > 10$$

WORKSHEET

Linear Systems of Inequalities:

14-24 Evens.

Solving Quadratic Inequalities
