

Group Members	Colin Madill, Jesse Branter, Johnnie Logan, Hillary Knapp
Date	January 21st, 2019
Topic	Music Technology
Materials	Macs in computer lab, Personal Macbooks and iPads, Garage Band (pre-installed)
Summary	This workshop is for teachers and educators looking for a beginner crash-course in Garageband, how to navigate the interface, utilize patches and sound effects, recording functions, and use basic editing software. Participants can expect to come away with an understanding in how to use Garageband and be able to integrate music technology education into their classrooms.
Objective	Given guided practice, modelling, and discussion, the student will be able to navigate and utilize the basic interface of GarageBand as assessed by completing a worksheet which will be marked for completion upon the end of the workshop.
Activities	Using Goose Chase and or a worksheet, participants will navigate the basic interface of GarageBand to create an original composition.
