MARGA PACIS (WITH RVW + HAROLD GLASSER)

PROJECT

THE INTERACTION BETWEEN TRANSFORMATIVE LEARNING & KEY SUSTAINABILITY COMPETENCIES

ABOUT THE PROJECT

Transformative Learning: a rational, metacognitive process of reassessing assumptions and expectations that influence our thinking, feeling, and acting (meaning perspectives) (Mezirow, 2009).

THIS PAPER AIMS TO:

- Analyze and integrate transformative learning with KSC
- Specify forms of transformative learning specific to creating sustainable well-being
- Identify pedagogies that can facilitate transformative learning to achieve KSC
- Propose methods of assessment
- Identify gaps in the existing literature (i.e. indigenous ways of knowing, gender, blue collar workers, etc.)

PROGRESS:

It was a linear path, and I do have a work plan written up. However, the paper seems to be meandering a bit. I have a solid base written, but am now collecting new papers and doing more reading to inform this new direction.

I aim to have a draft solidly done by mid June.

PROCESS:	
Problematic frames of reference, mindsets, mind habits	
Disorienting dilemma, cumulative experiences, disruptions	Leopold's wolf, Carson's Silent Spring, or EfS
[Critical reflection] Integration of 'new' or 'better' frames of	Key Sustainability Competencies as a guide -
reference Make frames of reference more inclusive, open, reflective, adaptive	Sustainable Well-Being

EDUCATION FOR SUSTAINABLE WELL-BEING
