

**Job Title** : Software Development Co-op (8 Months)

**Submission Deadline** : July 24<sup>th</sup> 2017

**Overview:**

Wanted: Aspiring software developers who are fast learners, great communicators, and ping pong or foosball gurus who want to join one of the Top Employers for Young People and one of top 5 SaaS companies in Canada!

You want to help change the way the world views customers.

From professional sports teams to Fortune 100 companies, we work with some of the biggest brands in the world – and so will you. We are a successful global software company with a start-up mentality. Our leadership team is always available, teams work side-by-side and fresh perspectives are not only encouraged, they are celebrated.

Vision Critical was born from the idea there had to be a better way for companies to connect with the people who matter most to them: their customers. The belief that people matter is the core of our culture.

We believe that people have wisdom that's worth listening to, learning from and acting on. Be one of those people at Vision Critical. Join us!

Software Development Co-op (8 Months) – Starting September 5, 2017

**Who You Are:**

A Computer Science or Engineering student wanting to prove yourself, test your limits, build great software, and be mentored by top notch developers

A team player who will contribute to an Agile team as an engineer building our industry leading SaaS product suite

Driven, focused and results-oriented always looking to learn cutting-edge technologies

Looking to open doors and start your career with one of the Top SaaS companies in Canada

Very confident with at least one modern programming language

Enjoy learning from hands on experiences such as Hackathons

Someone who wants to embrace a work/life balance so you can enjoy all that Winnipeg has to offer

What you'll learn:

Develop using a variety of cutting edge tools and technologies:

Languages: C#, Android and iOS Development, HTML5, JavaScript frameworks (jQuery, RequireJS, AngularJS, React), CSS3, .NET Technologies

Databases: SQL, Oracle, Redshift

Testing: NUnit, Selenium, Specflow

AWS Services: Virtual Servers, Load Balancing, Lambda, S3, Redshift, and many others

Progressive Development Methodologies:

Fast-paced agile environment with one week sprints

Continuous integration, continuous delivery

Test driven development, paired programming

Want an insider's view of Vision Critical? Check out a day in the life of a software developer at VC!

At the end of the work term, if there is a great fit, Vision Critical may provide students with the opportunity to take on full-time positions!

If this sounds like the perfect opportunity for you, we invite you to apply online now. Please include your school transcripts with your resume or cover letter.
