

PLAN 599: ENVIRONMENTAL POLICY ANALYSIS

An Introduction to Risk and Decision Analysis for Environment, Technology and Climate Adaptation Choices

**Term 2, Tuesdays and Thursdays
2:15-4:15pm**

The basic concerns of this class include:

- 1) How to think about risks systematically.**
- 2) How risks are addressed in academic and professional writing on societal responses.**
- 3) How to structure straightforward, yet helpful analysis for risk issues ranging from hazardous facilities, to climate change.**

Dr. Tim McDaniels, Ph.D.

Tim McDaniels is a specialist in decision sciences and policy analysis, particularly in managing environmental and technology-related societal risks.
