

## 2015 Call for YINI Research Proposals

### **“The role of yogurt in the prevention and management of non-communicable diseases”**

Proposals are requested for projects focused on **“the role of yogurt in the prevention and management of non-communicable diseases”**. Researches focused in the following areas are particularly encouraged: mechanisms of action; pediatric populations and diet quality and health parameters.

For 2015 \$30,000 (thirty thousand dollars) are available to support one application.

The competition is open to research teams from public research organizations or researchers at universities or hospitals. Applications can be from individuals, a single team or several teams in collaboration. Proposals must be neither previously published nor subject to patent disclosures.

#### How to Apply?

The rules can be downloaded from the YINI website [www.yogurtinnutrition.com](http://www.yogurtinnutrition.com)

or obtained by email: [ana.pires@danoneinstitute.com](mailto:ana.pires@danoneinstitute.com)

**The deadline for submission of applications is 1st September 2015.**

**For more information please visit [www.yogurtinnutrition.com](http://www.yogurtinnutrition.com)!**

The Yogurt in Nutrition Initiative (YINI) is a multi-year global, collaborative project led by the Danone Institute International in collaboration with the American Society for Nutrition and International Osteoporosis Foundation which aims to evaluate the current evidence base on the nutritional impact of yogurt. The mission of the project is to uncover scientific data related to yogurt, stimulate new research and identify gaps in our understanding of the health effects of this food category in order to share this information with professionals and the public.
