Room 160

MacMillan Building

2357 Main Mall

The series is open to the public.

Photo: Axine Water Technologies

Axine has developed the world's cleanest, safest and lowest cost solution for treating toxic organic pollutants in industrial wastewater. Axine's service model provides customers access to the technology with no upfront capital across multiple industries.

As Business Development Executive, Jessica supports sales operations, executes market analysis and lead generation, manages accounts, and builds partnerships. She also supports the CEO in raising capital and developing the marketing and business strategy.

Jessica has more than a decade of experience at the intersection of environment and finance. She previously worked for the B.C. Ministry of Energy and Mines, and the B.C. Climate Action Secretariat.

This series is organized by the Master of Food and Resource Economics Program. mfre.landfood.ubc.ca
