EDCP 508D (951): *Cross-Cultural Research in an Era of Climate Change and Global Inequities*

Shukshuyaku, Peru, 2018

Professor: Dr. Peter Cole

Summer Term 2 2022

Office: Scarfe 2329

Email: coyoteandraven@mac.com

Dates: July 25–Aug. 8, 2022

Time: M–F, 11:30 am–3:30 pm

COURSE DESCRIPTION

This research methodology course explores opportunities and challenges of conducting research across different worldviews, knowledge systems, languages and geographies. The focus of this course is to guide students as visionaries and architects of change in the design of cross-cultural research in this era of climate change, global socioeconomic inequities and pandemics. Students will critically reflect on how their own cultural worldviews, lived experiences, sense of place and life narratives influence the shaping of their research projects as they work to articulate research method(ologie)s and research projects that promote a more just, compassionate and ecologically sustainable world.
