

2022-2023

Cultivate Tomorrow Hackathon

Students reimagining the future of food.

Cultivate is the first program that provides students from all backgrounds, areas of study, and experience levels with the opportunity to explore the cellular agriculture industry through an engaging, team-based challenge.

The hackathon competition calls for students to examine some of the most pressing challenges in the cell ag industry.

The hackathon fosters creativity, problem-solving, and out-of-the-box thinking that will aid the understanding, development, and integration of cell-based products.

Student Overview

- Collaborate with students interested in cell ag across universities in groups of 3-5
- Receive guidance from an assigned industry mentor
- Participate in one of two tracks: Advertising Track or Underutilized Resource Track
- Spend several months solving your track's prompts with your team and mentor
- Submit final deliverables at the final Cultivate Tomorrow Hackathon event
- A panel of expert judges will evaluate the final presentations; winners will receive cash prizes!
