Hiring Manager  
IXL Learning  
777 Mariners Island BLD #600  
San Mateo, CA 94404

Dear Hiring Manager:

Please consider my application for a New Grad Software Engineer Position at your San Manteo Office, as advertised on July 3<sup>rd</sup> on UBC Careers Online. I will graduate from the University of British Columbia in May 2018 with a Bachelor of Science in Computer Science.

As you can see from my enclosed resume, I have previously completed an internship at an enterprise software company. I was a part of the Performance and Reliability Team where I was responsible for helping to ensure that the product was scaling well as the number of customers increased. I worked with Javascript, Jasmine Test suites, Git as well as various performance and scalability related testing tools.

Outside of school and internships, I have also done my own personal projects using React. I am currently developing a very simple productivity application that implements the Pomodoro Technique as a web app. I have made all the decisions regarding which technologies to use and I manage the app on Github using issue trackers.

My previous work experience has helped to hone my reasoning and communication skills. Through working on my personal projects I have improved on my problem-solving skills and I am confident in my ability to work independently. I am also very excited to have the chance to work in a team environment as I enjoy being able to communicate with my team members and learn by sharing ideas.

If my qualifications meet your needs, please contact me on any weekday at 604-822-2211 or email at [tamaki.marissa@gmail.com](mailto:tamaki.marissa@gmail.com)

Sincerely,  
Marissa Tamaki
