OBJECTIVE	New graduate software development position

PERFORMANCE AND RELIABILITY (TEST) SKILLS

- Conducted bi-weekly Scalability Tests that ensured no bugs were introduced into the software
- Produced results that were reviewed by product stakeholders
- Executed tests to help stakeholders determine how scalability should be handled as the product expanded

SOFTWARE DEVELOPMENT SKILLS

- Developed LoadRunner, Jmeter and Selenium scripts to perform performance and reliability testing
- Wrote Javascript tests using Jasmine test suite
- Used Git, GitExtensions and Perforce to commit code
- Developed applications using Javascript and TypeScript and have experience with React and Vue Frameworks

COMMUNICATION SKILLS

- Reported performance bugs on Jira to other teams working on the product
- Communicated with co-workers around the world to help fix bugs
- Communicated with team members by email and other messaging platforms
- Participated in daily stand-up meetings to discuss tasks for the day

EDUCATION

University of British Columbia
