

The diagrams below are designed to help you identify and name pairs of angles that share common characteristics.

Determine the value of each marked pair of angles in each diagram and as a group try to identify what special characteristic each pair of angles shares.

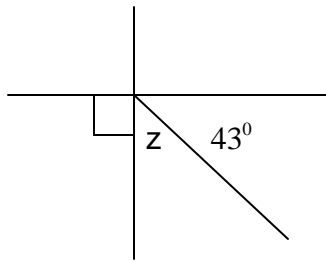

1.

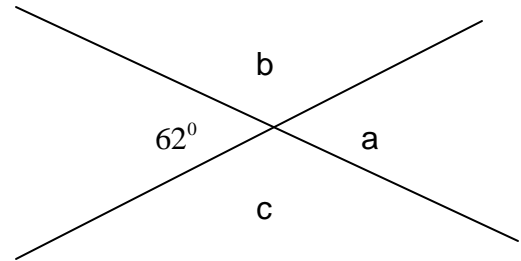

2.

3.

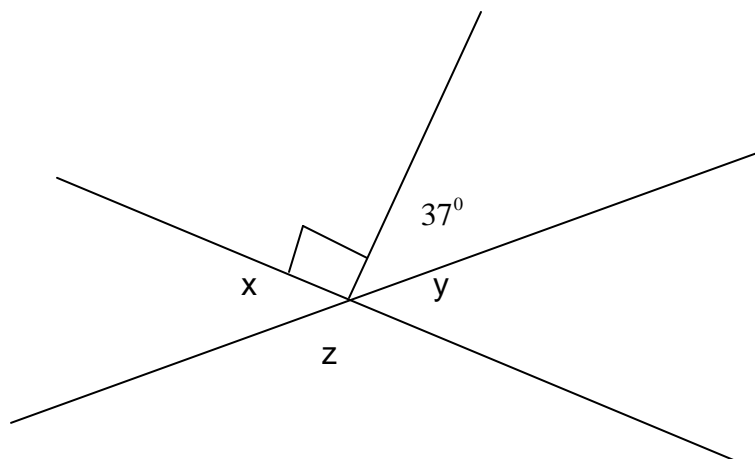

4.

62° and a 62° and b b and c

5.

37° and y x and y x and z z and y
