

INFANT STUDIES CENTRE / WERKER LAB

VOLUNTEER RESEARCH ASSISTANTS NEEDED!

We are looking for motivated undergraduates who...

- ✓ Are interested in language acquisition, the brain and development
- ✓ Would enjoy working with parents and their infants (2-30 months old)
- ✓ Can commit to 9 hours/week throughout the Winter terms
- ✓ Have a GPA of at least 80% either overall or in their latest terms

RAs will be trained to contact families to invite them to participate in our infant studies (wherein we use behavioural, EEG, and fNIRS methodologies); to prepare materials for upcoming studies; and to code videos of infant looking time behaviour. RAs who excel are typically assigned to specific, ongoing projects that involve valuable hands-on research experience!

To apply, please send a brief statement of interest, résumé/CV, and unofficial transcript (e.g. SSC grades summary) to Jack, Research Coordinator, at jack@psych.ubc.ca. Applications will be assessed as they are received.
