

Please record the scores by filling in the bubble to the left of each behavior described in the checklist.

Fill in 0 if the behavior was NOT observed; fill in 1 if it was.

For the 0-3 ratings use the scale:

0=not attempted; 1=attempted but insufficient; 2=performed but needs improvement; 3= satisfactory

		Set-up	<u>Comments</u>
0	1	1 Washes hands at appropriate times.....	_____
0	1	2	_____
0	1	2 Assesses potential injection sites completely (landmarks deltoid, palpates muscle tissue using pads of fingers)	_____
0	1	3 Checks medication at appropriate times (including drug, DIN, expiry, product suitability)	_____
0	1	4 Selects appropriate needle size and type of syringe (25G, 1")	_____
0	1	5	_____
0	1	5 Attaches needle to syringe appropriately (opens packaging and firmly attaches needle to syringe without contamination by fingers or surface)	_____
0	1	6 Cleanses top of vial appropriately.....	_____
0	1	7	_____
0	1	7 Prepares dose appropriately (correct volume of air into vial, aseptic handling of apparatus)	_____
0	1	8 Removes air bubbles efficiently without bending needle.....	_____
0	1	9 Measures dose accurately.....	_____
0	1	10	_____
0	1	10 Arranges necessary materials in appropriate orientation (prepared injection – loosely capped, cotton ball, opened alcohol swab, sharps container within arm’s reach)	_____

		Administration	<u>Comments</u>
0	1	1 Washes hands at appropriate times.....	_____
0	1	2	_____
0	1	2 Landmarks appropriately for injection (palpates acromion process, forms “injection triangle” over deltoid, palpates muscle tissue using pads of fingers to ensure relaxed)	_____
0	1	3 Cleanses injection site appropriately with alcohol swab.....	_____
0	1	4	_____
0	1	4 Communicates appropriately throughout procedure (positions properly & assists patient to relax, warns patient of impending injection)	_____
0	1	5	_____
0	1	5 Provides safe and effective injection (90° angle maintained, full depth, fluid darting motion, full dose administered smoothly and rapidly)	_____
0	1	6 Applies pressure (not rubbing) at the injection site with a cotton ball.....	_____
0	1	7 Does NOT compromise personal safety with administration.....	_____

		Post-administration	<u>Comments</u>
0	1	1 Does NOT recap the needle and disposes of equipment safely.....	_____
0	1	2	_____
0	1	2 Communicates with patient appropriately (checks-in, waiting time, signs of severe allergy)	_____
0	1	3 Washes hands to conclude procedure (after assessing need for adhesive bandage)	_____
0	1	4 Completes documentation appropriately.....	_____

Global rating: For each section and overall, please rate student’s global performance
 Use the scale: 1=Unsatisfactory; 2=Borderline Unsatisfactory; 3=Borderline Satisfactory;
 4=Satisfactory

OVERALL..... 1 2 3 4

Please record additional comments (if any) on the back of the sheet.

Examiner: _____
