

An aerial photograph of a rugged, rocky coastline. In the foreground, a white bird, possibly a gull, is captured in flight, its wings spread wide. Below the bird is a small, irregularly shaped pond with a vibrant green hue, surrounded by dark, wet rocks. The background shows the ocean with varying shades of blue and green, suggesting different depths or water conditions. The overall scene is dramatic and naturalistic.

# "Why is the Arctic Ocean sensitive to industrial contaminants?"

Presented by:

**Dr. Robie Macdonald**

Senior Research Scientist,  
Institute of Ocean Sciences,  
Sidney, BC

**Where: St. John's College Lecture Hall**

Rm. 1080, 2111 Lower Mall, UBC

**When: Tuesday May 3<sup>rd</sup>, 2011**

**Time: 1 – 2 pm**
